

## 2009 U.S. Trade and Investment Conference

*The U.S. Embassy in Maputo, Mozambique cordially invites you to participate in the U.S. Trade and Investment Conference that will take place on July 15 and 16.*

The President of Mozambique and senior government officials will discuss trade and investment opportunities in various sectors, including agriculture, energy, tourism and natural resources.

Mozambique has enjoyed steady economic growth and stability. The areas for potential investment are diverse and wide-ranging, and already U.S. trade is expanding rapidly.

The country is developing ports and transportation/logistics corridors. With nearly 90 percent of arable land uncultivated, the agricultural sector has great potential. In the energy sector, Mozambique is one of the few countries in Southern Africa with untapped capacity for generation. Mozambique also has significant natural resources, including mining minerals, forestry and fishing, coal, natural gas, and potentially oil.

Finally, in the area of tourism and eco-travel, Mozambique is considered to be one of the top emerging travel destinations in the world, boasting natural parks and thousands of miles of coastline with pristine beaches.

Please contact U.S. Embassy Maputo at [MozInvestorConference@state.gov](mailto:MozInvestorConference@state.gov) for conference details and RSVP by June 1st.
